Baltimore, Maryland 21202

The Current Resident

Baltimore, Maryland
Dear Resident:

The City has hired two consultants, URS Corporation and Savin Engineers, to perform dye testing to analyze possible interconnections between the sanitary sewer and storm drain systems in your neighborhood.

In order to determine if your property is properly discharging storm water to the storm sewer, it is necessary that a consultant enter the property and deploy a small amount of dye into the roof drain system. **At no time will an inspector need to gain access to the inside of the residence.** This process should take about one hour to deploy and verify. The dye will have no effect on your roof drain system and will be flushed through with clean water.

If you have any questions regarding this testing, please contact Tonorah Houston of the City DPW at 410-396-3440 or Nathan Atkinson of URS Corporation at 410-468-0875.

Sincerely Yours,

Jaswant S. Dhupar, P.E.
Division Chief
